DETAILED ACTION

Allowable Subject Matter

Claims 6-9 are allowed.

The following is an examiner's statement of reasons for allowance: The instantly claimed invention requires that a semiconductor device be coupled to a substrate via both a composite connector structure (comprising a core and a covering material) and a single layer connector structure. While prior art such as US 6,303,408 (hereafter Smith) does indeed disclose composite and single layer connector structures, they are not used to connect the same device to the substrate. Indeed, the composite structures are used exclusively to connect the semiconductor device in Smith and the single layer structure is only used to connect the film to the circuit board. There is no teaching or suggestion to intermingle the two sets of structures. Therefore, this limitation, in conjunction with the other claimed features was neither found to be disclosed in, nor suggested by the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
